## Tri-State Buffer ICs

## GENERAL DESCRIPTION

The 2300 Series are a group of high frequency, CMOS low power tri-state buffer ICs with input amplifier, divider and output tri-state buffer circuits built-in.

The series is available in an ultra small SOT-26 package.

## APPLICATIONS

- VCXO modules
- Crystal oscillator modules

## FEATURES

| Max. Operating Frequency | $: 70 \mathrm{MHz}$ |
| :--- | :--- |
| Operating Voltage Range | $: 3.3 \mathrm{~V} \pm 10 \%, 5.0 \mathrm{~V} \pm 20 \%$ |
| Divider Ratio | $:$ fin $/ 1$ |
| Output | $: 3$-State |
| CMOS Low Power Consumption |  |
| Built-In Input Amplifier  <br> Ultra Small Package $:$ SOT- 26 <br> Environmentally Friendly $:$ EU RoHS Compliant, Pb Free |  |

PIN CONFIGURATION

SOT-26 (TOP VIEW)

PIN ASSIGNMENT

| PIN <br> NUMBER | PIN <br> NAME | FUNCTION |
| :---: | :---: | :---: |
| 1 | /INH | Stand-by Control (*) |
| 2 | XT | Clock Input |
| 3 | VSs | Ground |
| 4 | Q0 | Clock Output |
| 5 | VDD | Power Supply |
| 6 | /XT | Feedback Resistor Connection <br> (Output) |

*Stand-by control pin has a pull-up resistor built-in.

■/INH, QO PIN FUNCTION

| /INH | Q0 |
| :---: | :---: |
| "H" or OPEN | Clock Output |
| "L" | High Impedance |

## PRODUCT CLASSIFICATION

- Ordering Information

XC2300(1)(2)(3)(4)(5)-(7) ${ }^{\left({ }^{(1)}\right.}$

| DESTINATOR | DESCRIPTION | SIMBOL | DESCRIPTION |
| :---: | :---: | :---: | :--- |
| $(1)$ | Duty Level | C | $:$ CMOS (VDD/2) |
| $(2)$ | Fixed Number | 2 | $:-$ |
| $(3)$ | Divider Ratio | 1 | $:$ Q0=fin/1 |
| $(4)$ | Output | V | : Tri-state buffer |
| $(5)(6)-7)$ | Packages <br> Taping Type ${ }^{\left({ }^{*} 2\right)}$ | MR-G | : SOT-26 |

${ }^{(* 1)}$ The "-G" suffix indicates that the products are Halogen and Antimony free as well as being fully RoHS compliant.
$\left.{ }^{( }{ }^{*} 2\right)$ The device orientation is fixed in its embossed tape pocket. For reverse orientation, please contact your local Torex sales office or representative. (Standard orientation: (5)R-7), Reverse orientation: (5)L-7)

1. The products and product specifications contained herein are subject to change without notice to improve performance characteristics. Consult us, or our representatives before use, to confirm that the information in this datasheet is up to date.
2. We assume no responsibility for any infringement of patents, patent rights, or other rights arising from the use of any information and circuitry in this datasheet.
3. Please ensure suitable shipping controls (including fail-safe designs and aging protection) are in force for equipment employing products listed in this datasheet.
4. The products in this datasheet are not developed, designed, or approved for use with such equipment whose failure of malfunction can be reasonably expected to directly endanger the life of, or cause significant injury to, the user.
(e.g. Atomic energy; aerospace; transport; combustion and associated safety equipment thereof.)
5. Please use the products listed in this datasheet within the specified ranges.

Should you wish to use the products under conditions exceeding the specifications, please consult us or our representatives.
6. We assume no responsibility for damage or loss due to abnormal use.
7. All rights reserved. No part of this datasheet may be copied or reproduced without the prior permission of TOREX SEMICONDUCTOR LTD.

## TOREX SEMICONDUCTOR LTD.

[^0]:    *) The feedback resistor (fixed) Rf must be connected
    *) When the duty needs to be adjusted because of power supply and/or input amplitude, duty resistor (fixed) Rb should be connected.
